Why we oppose the budget cuts

IT WILL MAKE US POORER

"In my view these cuts will be a disaster for ordinary working people who will see their living standards fall and unemployment rise."

David Blanchflower, Former Bank of England economist

IT IS THE WRONG CUTS

The richest 1,000 in Britain have seen their wealth increase by 30 per cent in the last year: £77bn – half the annual deficit.

Sunday Times Rich List 2010

IT IS UNJUST & UNNECESSARY

Progressive budget? You're joking!

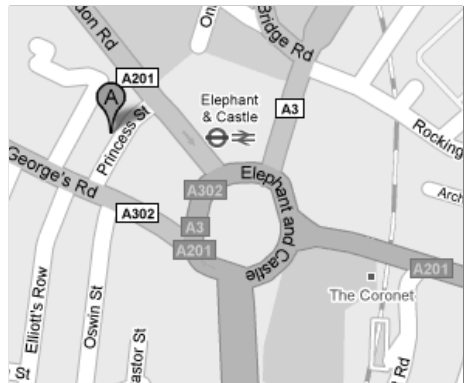

Financial Times' economics editor

Fight for a better future for all

The ConDem budget is a declaration of war against working class people who rely on public services. The government should be cutting military spending not vital council services; the government should be taxing the rich not cutting benefits and pensions. **Fight for your rights!**
