

Stop with this Hypocrisy

Labor is Democracy

Across the nation, public employees are under attack. We are being blamed for deficits, unemployment, economic decline because of our pay and pensions. “Reformers” are proposing to privatize government jobs and “trim” government through massive layoffs.

California is a “Blue State” but this is no magic shield against budget attacks. The State has billions in deficits and our pay and pensions are being targeted. The expiration of our union contract is a make or break situation for our collective bargaining rights and contract protections.
